

MATERIAL & MAINTENANCE

MATERIAL

POWDER COATED ALUMINUM

Outdoor furniture made of powder-coated aluminum is designed to be durable and weather-resistant. The powder-coating process ensures a robust and protective surface that withstands UV rays, moisture, and corrosion. To maintain the furniture's aesthetics and longevity, regular maintenance is recommended.

MAINTENANCE

CLEANING

- Clean regularly with a mild soap solution and lukewarm water.
- Use a soft cloth or sponge to avoid scratches.
- Dry thoroughly with a soft cloth to avoid water spots.
- Avoid using aggressive cleaning agents, as they may damage the powder coating.

PRESERVE & PROTECT

- Do not place furniture in the pool or in damp locations.
- Avoid placing sharp or heavy objects directly on the furniture, as this may cause scratches or dents.

COATING PROTECTING

- Small scratches and scuffs can be treated with a matching HOUE Repair Lacquer to help prevent corrosion.
- If the coating becomes dull or worn, it can be refreshed using an automotive wax suitable for powder-coated surfaces.
- Regularly inspect for any damage – especially around joints and edges—and treat them promptly with appropriate coating solutions.

STORAGE

- To extend the life of your furniture, clean and dry it before storing in a covered, dry location (e.g. with a furniture cover) during the off-season or extended periods of non use.
- Ensure the furniture is completely dry before storing to prevent condensation and coating damage.

MATERIAL

WARRANTY

5-YEAR WARRANTY on Powder-coated aluminum covering structural integrity, and resistance to environmental factors under normal use, weather conditions and maintenance. See HOUE Warranty Terms for further information.
