

# MATERIAL & MAINTENANCE

---

## POWDER COATED STEEL

---

Powder-coated steel with a dual-layer powder coating is a durable solution for outdoor furniture, providing protection against rust, UV rays, and moisture. The double-layer coating offers extra defense against wear and weather conditions, but proper maintenance is still necessary to ensure longevity.

---

### CLEANING

- Clean regularly with a mild soap solution and lukewarm water.
- Use a soft cloth or sponge to avoid scratches.
- Dry thoroughly with a soft cloth to avoid water spots.
- Avoid using aggressive cleaning agents, as they may damage the powder coating.

### PRESERVE & PROTECT

- Please avoid placing outdoor furniture in water, pools, spas, or damp/humid areas.
- Avoid placing sharp or heavy objects directly on the furniture, as this may cause scratches or dents.

### COATING PROTECTING

- Small scratches and scuffs can be treated with a matching HOUÉ Repair Lacquer to help prevent corrosion.
- If the coating becomes dull or worn, it can be refreshed using an automotive wax suitable for powder-coated surfaces.
- Regularly inspect for any damage – especially around joints and edges—and treat them promptly with appropriate coating solutions.

### STORAGE

- To extend the life of your furniture, clean and dry it before storing in a covered, dry location (e.g. with a furniture cover) during the off-season or extended periods of non use.
- Ensure the furniture is completely dry before storing to prevent condensation and coating damage.

## WARRANTY

---

3-YEAR WARRANTY on Powder-coated steel covering structural integrity, and resistance to environmental factors under normal use, weather conditions and maintenance. See HOUÉ Warranty Terms for further information.
